

CHARLIE CARP

PREMIUM ORGANIC FERTILISER AT THE HEART OF GOOD ORGANIC GARDENING

- ✓ Low Salt NPK + TE provides immediate relief with plant nutrient deficiencies especially when plants are under stress
- ✓ Natural fish oils enhance nutrient uptake via leaf, stem and root absorption
- ✓ Addition of kelp is an essential bio-supplement, which can provide enhanced frost resistance, root promotion and stress resistance
- ✓ Promotes beneficial soil microbial stimulation, breakdown of organic matter, even growth without surge effects and improved plants natural immune system

AVAILABLE IN 1L & 20L

Helping save our rivers & lakes from European Carp

Application	Directions
Avoid applying during heat of day	
Vegetable Crops	Agitate concentrate very well prior to mixing. Mix Charlie Carp 1:10 with water, e.g. 1 litre to 10 litres of water. Apply 100-200 litres of mixture per hectare. Reapply every 2-4 weeks during growing season.
Stone Fruit/Olives	Agitate concentrate very well before applying. Mix Charlie Carp 1:10 with water, e.g. 100ml to 1 litre of water. 1 litre of mixture will treat 2-3 trees. Reapply monthly for best results.
Pasture & Lucerne	Mix Charlie Carp 1:10 with water, e.g. 1 litre to 10 litres of water. Apply 100-200 litres of mixture per hectare. Agitate concentrate prior to mixing.
Cereal Crops	Mix Charlie Carp 1:10 with water, e.g. 1 litre to 10 litres of water. Apply 100-200 litres of mixture per hectare. Agitate concentrate prior to mixing. Ideally suited as a top dressing fertiliser for application between first node and early boot stages. Suitable for aerial application
Grapes	Mix Charlie Carp 1:10 with water, e.g. 100ml to 1 litre of water. 1 litre of mixture will treat approximately 10 metres of vines. Reapply monthly for best results, particularly in growing season.
