

# FLUSHOUT POINTS

## *Points For Cleaning*

Confast Subsoil Cleanout Structures have been designed to ensure a safe and secure access point to Subsoil Drainage System for periodical maintenance.

- The Cast Iron box has been manufactured from the highest grade of pig iron, encased in a sturdy concrete surround providing an ease of entry, while providing protection to the Drainage System.
- A brass holding screw is used to secure the flush out point's lid, preventing damage to the structure and providing many years of trouble free service.
- All Flushout Points lids are marked as specified by the Roads &Traffic Authority.

WEIGHT:26kg - 300mm x 300mm Concrete Surround
