

PROTECTEX WILLOWS TIMBER PRESERVER

TECHNICAL DATA SHEET

PRODUCT DESCRIPTION

Protectex Willows Timber Preserver is a multigrade mineral based parafinic oil blend that provides advanced protection and is suitable for a range of applications including timber poles, fences, posts, building frames etc.

PRODUCT FEATURES AND BENEFITS

Protectex Willows Timber Preserver protects timber above ground and underground from moisture traveling through the timber.

The blend of parafinic oils and waxes makes it a unique barrier for the prevention of rot in timber.

Protectex Willows Timber Preserver has no smell, is non hazardous and completely safe to use.

As the oils stay tacky for several weeks the treatment is ideal for underground protection. However Protectex Willows

Timber Preserver also works well above ground also.

Depending on the thickness of coating applied the treated timber will remain moist and tacky for several weeks.

APPLICATION AND USAGE

- BRUSH
- ROLLER
- SPRAY
- DIP

Under normal circumstances the product is ready to use but, can be reduced with hydrocarbon solvents if needed.
