DISC1	1 Litre Concentrate
DISC5	5 Litre Concentrate
DISC20RTU	20 Litre R.T.U
DISC20	20 Litre Concentrate
DISC200	200 Litre Concentrate

BEFORE

AFTER

Discrete is an advance in the chemistry of removing cement and grout residue from concrete mixing and transporting equipment, newly laid tiled flooring and a variety of surfaces affected by cement splash on the construction site.

Discrete is based on acid-replacement technology and although low in pH does not contain traditional acids.

Benefits:

- **Free of traditional acids** - employs proprietary low pH acid replacement technology.
- **Safety First** - exceptional safety. Classified as a mild skin irritant. No chemical Burns
- **User Friendly** - minimal fuming mean outstanding user satisfaction especially in confined spaces.
- **Non-Corrosive** - when used as directed it is non corrosive to ferrous metals and polished
- **Solvent Free** - will not attack rubber seals, stable paint surfaces and hoses.

Directions:

- Mix one part Discrete with 4 to 9 parts water. Use undiluted on tough deposits.
- Brush onto area to be cleaned. Agitate vigorously and allow 10 to 30 minutes reaction time.
- Rinse thoroughly with a pressure washer.
- Repeat process if required
