

Profab AS140 nonwoven geotextiles are comprised of polyester fibres needled together into a stable matrix that provides excellent physical and hydrulic properties. The product is manfactured to Australian standards & ISO 9002 quality procedure.

ProFab geotextiles are easily installed and conform to the ground or trench surface. The geotextile is strong enough to withstand severe installation stresses yet exhibits great permeability to provide high flow rates and filtration properties. ProFab geotextiles are chemically resistant to naturally occuring soil alkalis and acids.

Typical Properties						
Property	Test Method	Unit	Typical Value			
Typical Mass	AS3706.1	g/m²	140			
Grab Tensile	AS2001.2.3	N	400			
Pore Size	AS3706.7	mm	0.2			
Flow Rate	AS3706.9	1/m²/s	300			

Roll Sizes						
Length	Widths					
50M	600mm	1000mm	1200mm	2000mm
