

Rid a Rot Fungicide

Sharp Shooter

- ✔ Excellent on Australian natives
- ✔ Environmentally friendly, safe for people and the environment (S.G.A * approved)
- ✔ Acts as both a preventative and a curative
- ✔ Systemic - gets into sap stream of plant
- ✔ No withholding period, so it can be sprayed up to harvest

Controls Diseases: Die Black, Collar Rot, Phytophthora, Root Rot, Crown Rot and Downey Mildew

For use on: Citrus Trees, Ornamentals, Avocado, Grapes and Australian Natives

When to use: Apply whenever disease is present in 3-5 week intervals and can also be used as a preventative spray at 4-6 week intervals. For best results ensure there is through leaf coverage.

Phosphorus acid has been used by commercial growers to prevent diseases infecting plants for many years. Rid a Rot is a low toxicity fungicide in a convenient easy to use liquid form. Rid a Rot is absorbed by the leaves and travels down to the root of the plant. Used regularly, Rid a Rot provides a defence for your plants against diseases, making them healthier and more productive.
